

#Problem Statement: Build a platform for finding and tracking events.

The Mission: Build an intelligent chat interface with real-time capabilities.

Frontend UI & User Interaction:

- **Event Calendar:** A calendar grid highlighting dates with local events.
- **Event Cards:** Featuring event title, venue, date, time, and "Interested" button.
- **RSVP Dashboard:** A dedicated space showing all confirmed event attendance.

Backend Logic & State Management:

- **Event Feed:** Fetches event listings from the Ticketmaster API.
- **Persistence:** MongoDB manages RSVPs, user profile details, and event reminder settings.

The Vibe Check: Add a "Friend Invite" system. If a user RSVPs to an event, allow them to generate a "Share Link." The backend must track how many users clicked that link and display a "Friends Attending" count on the event card.

#Candidate Guidelines: Please read the following instructions carefully before appearing for the assessment.

Assessment Details:

- The Vibe Coding Round will begin sharply at **02:55 PM** and conclude at **04:45 PM**.
- Candidates are expected to join the assessment platform (Unstop) 10 mins prior.
- Once the round begins, the detailed problem statement will be shared on Unstop.

Proctoring & Setup Requirements:

- You must share your entire screen throughout the assessment.
- Your camera & mic must remain switched on for the complete duration of the round.
- Unstop will proctor the assessment throughout the session.

- Any suspicious activity, violation, or attempt to bypass proctoring guidelines may impact your score and candidature.

Use of AI Tools

- Candidates are permitted to use any AI tool to complete.
- The evaluation will focus not only on the final solution but also on your understanding of the implementation during the subsequent Viva round.

[IMP] Submission Process:

- We suggest spending the first 5 mins understanding the problem statement.
- Plan your time effectively to ensure you have sufficient time to upload your solution to GitHub and complete the submission process before the deadline.
- Maintain meaningful and incremental Git commits that clearly reflect the functionality implemented at each stage of development.
- Follow a clean, scalable, and well-structured architecture for both the frontend and backend components of your solution.
- All business logic, calculations, validations, and computations should be implemented on the server side. The frontend should primarily handle presentation and user interactions.
- After uploading your code, submit the GitHub repository link on [Unstop \(Vibe Coding Submission\)](#).
- **The GitHub link must be submitted no later than 04:45 PM (Oct 1st).**
- Any submission received after 04:45 PM will be automatically disqualified.
- We will verify GitHub commits and upload timestamps. Any edits, commits, or modifications made after 04:45 PM (Oct 1st) will lead to disqualification.
- Ensure that the **GitHub repository is publicly accessible** for review.

Restrictions:

- Mobile phones/Calculators or any other device is strictly prohibited.
- **Do not connect headphones or any Bluetooth-enabled devices during the round.**
- Please ensure that all system notifications, pop-ups, and distractions are disabled.
- External assistance from any individual is strictly prohibited.

Candidate's Responsibility:

- A quiet, well-lit environment & a stable/reliable internet connection.

- A fully charged laptop and access to power backup if required.
- Sufficient access to the AI tools you intend to use, including any token, usage, or subscription limits.

Final Note

- No re-attempts or extensions will be provided under any circumstances.
- By participating in this round, you agree to adhere to the assessment guidelines and maintain the highest standards of integrity and professionalism.

We wish you all the best for the Vibe Coding Round!
